Dear Jim and Chuck:

As manager of Shannon Trees Mobile Home Park for the past three years, one of my biggest problems has been insect control. Mainly for ants, cockroaches and crickets.

Until I heard of "Diacide", it was not only a losing battle, but an expensive one.

We started using "Diacide" and applying it ourselves eight months ago and so far the results have been excellent.

In Tucson, ants have been our most vexing problem, because nothing we tried seemed to work, but now "Diacide" has done it so far for us. We just dust it on the ant hills and in a twelve or fourteen inch circle around the ant hills. Things are pretty well under control inside of two hours.

Cockroaches and crickets are controlled by dusting under the mobile homes and down the sewer connections. Here again control is quite rapid and lasting.

Best of all we can assure our tenants that the material we are using is SAFE for themselves, their children and pets.

Sincerely,

Mary A. Piper
Property Manager
