Phoenix, Arizona 85016

Dear Chuck:

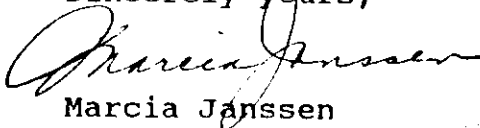

I'm so pleased to be able to once again obtain Perma Guard Diatomaceous Earth and Diacide. There are so many uses for it around here.

The horse and dogs are fed D.E. daily. The goats and chickens are free-fed and love it. I also spread it in their pens.

I had a tick problem last summer, and by spreading Diacide on the ground in the kennel runs and dusting the dogs and dog houses, noticed an immediate decrease in not only the ticks, but flies.

It's great to be able to use Diacide and D.E. again - so good for the eradication of so many nuisance pests - and most importantly, they're safe for my animals.

Sincerely yours,

Marcia Janssen
